I have had XM for 2 years and I enjoy it. I have been using the Instant Traffic & weather since it started and have been waiting for the additional cities. I travel alot for work and it helps a great deal when I'm driving. Besides, the fact that I pay monthly to have the ability to have Instant Traffic & weather at a push of a button and don't have to search for a local station that might be on a commercial and I miss it. At least with Intstant weather & Traffic I can pull off the road and find an alternate route. And not have to sit in traffic. What's next are you going to take The Weather Channel off of cable?? Please do not take Instant Traffic & weather off of XM Radio.
